

# Check printing made simple, safe, and secure.

In 2011, Piracle proudly launched Create-A-Check 10. The most innovative iteration of our most popular software package, Create-A-Check 10 balances the simplicity, safety, and security Piracle customers have come to expect since our inception in 1991. From that time onward, Piracle has strived to combine security, dependability, and sustainability with our line of "Total Solution" payment management products.

Now compatible  
with Windows 7 &  
Server 2008

**Simple** Building on its predecessors, Create-A-Check 10 offers users a simple, network deployable check-writing solution with email capability when processing ACH payments. Create-A-Check 10 seamlessly integrates with virtually any accounting software program and can be deployed in as little as twenty minutes.

**Safe** Create-A-Check 10 provides users with the most extensive back-end safety functions including comprehensive password security with signature, logo, and program data encryption. Users can also assign signature thresholds to specific accounts and/or amounts.

**Secure** Create-A-Check 10's secure, encrypted software program now incorporates Positive Pay which radically reduces the risk of fraud. Additionally, when used in conjunction with Piracle's certified MICR toner, Create-A-Check 10 eliminates the need for storage and control of pre-printed check stock, providing an extra layer of security.

## Create-A-Check LE

Create-A-Check LE offers a highly secure, flexible, and easy-to-use check printing software designed with small to medium-size corporations in mind. And because LE integrates with dozens of accounting programs, setup and implementation is simple.

- Up to ten checking accounts and three users\*
- Logo, signature & program data encryption with comprehensive password security
- Optional Positive Pay, ACH file generation with email notifications, additional user accounts
- Support & supplies for a wide range of standard printers

## Create-A-Check XT

Create-A-Check XT offers users an email-capable, network-deployable check-printing solution with greater flexibility, security, and customization. XT also seamlessly integrates with virtually any accounting software program.

- Unlimited checking accounts and up to ten users\*
- ACH file generation with email notifications
- Logo, signature & program data encryption with comprehensive password security
- Direct Deposit, A/P, Payroll, and Positive Pay capability
- Support & supplies for a wide range of standard printers
- Custom programming available

*\*Additional users available*
