

Check Printing Made Safe

Create-A-Check 10 offers users an email-capable, network-deployable check-printing solution with greater flexibility, security, and customization. Seamlessly integrating with virtually any accounting software program, Create-A-Check 10 builds upon its predecessors by providing improved security features, increased workflow processes, and the greater ease-of-use with the addition of a new intuitive user interface and email capabilities.

Create-A-Check 10 provides users increased workflow control enhancements with the most extensive back-end safety functions, including comprehensive password security with signature, logo, and program data encryption. Users can also assign signature approvals and thresholds to specific accounts and/or amounts.

Increased workflow and security controls, with stricter password management and signature thresholds and approval by account.
