

Run All of Your Sage Timberline Office Reports in *Less Than Two Minutes!*

Timberline reports running slowly?

Find out how to run any report in less than two minutes!

Cornerstone Solutions has teamed up with Anterra to deliver anterraDataCenter™ - a server tool that synchronizes all of your Sage Timberline Office data from all folders into a single SQL database.

Complex reports will run in a fraction of the time plus you will be able to work with all of your data in spreadsheets to consolidate and analyze information from all of your data folders.

With anterraDataCenter™ archiving data can be done at any time as it's easy to report off of a combination of current and history files.

To see how this powerful solution can help your organization you can watch a short executive overview video by clicking on the link below:

You can also review frequently asked questions, release notes and the free consolidating drill down report designs that come with anterraDataCenter™ on Anterra's web page.

For questions, inquiries or to arrange an on-line demo please contact Cornerstone Solutions directly by email at lindap@corner-sol.com or call 630-288-3351 or toll-free 866-482-3400 x503.

Testimonials

"Within two years of using Timberline, our Timberline database had become too large to report efficiently, diminishing reporting capabilities. anterraDataCenter™ changed all that. Now, not only do our Crystal Reports return data within a small fraction of the time previously required, but the SQL Server query capabilities have opened up possibilities for even more powerful and sophisticated reports. For any Timberline user who is serious about getting the most out of their Timberline data, Anterra is a must-have."

– Dave Yrueta, Basco Drywall, California

"What a relief! No more multi-database reporting. The anterraDataCenter™ software tool makes the integration from Pervasive to SQL a non-event. Our employees can now view reports on a web page, utilizing Microsoft SQL Reporting Services with data from our Timberline data sources. Seamless! What a great tool!"

– Mark Dille, Lang Masonry Contractors, Inc., Ohio

"Best Timberline Add-On we could have bought. It allows us to get data out easily and efficiently to be used in our day-to-day reporting throughout the company. Also, it came through as a backup when our whole Timberline database was wiped out and we had no clean backups."

– Kevin Lewis, Burroughs & Chapin, South Carolina
