Check Printing Made Simple, Safe, and Secure

Create-A-Check 10 provides one of the industry's simplest, most secure, and most flexible methods of printing your own checks. Create-A-Check 10 works with your existing accounts payable or payroll software and combines this data with your specified check layout to create MICR-encoded checks. Create-A-Check 10 allows users to:

- Eliminate the need for buying and storing pre-printed check stock saving you money and space.
- Integrate with your accounting software to create ease-of-use, reduce dual input, and provide added security.
- Produce PDF documents of originals and copies to help support the paperless office and accounting document storage and distribution back-ups.
- Generate electronic files for Direct Deposit, Vendor Payments and Positive Pay, streamlining your accounting workflow while providing protection against fraud.
- Create ACH payments, providing user with the ability to transfer funds electronically from one bank account to another and print or email remittance for the vendor/payee.
- Create digitally encrypted signatures and logos plus comprehensive password security, protecting your sensitive data and deterring fraud.
- Print other forms like deposit slips, 1099's, W2's, invoices, purchase orders and statements, eliminating the need for pre-printed form stock.
