

Easily create and share financial statements across your company

Viewpoint's versatile General Ledger is fully integrated with all of our accounting and operations modules, providing multi-company and multi-level profit center reporting. With Microsoft® Office Performance Point™ 2007 Management Reporter (formerly FRx), you're able to create flexible, presentation quality financial statements and drill-down inquiries.

This easy-to-use and powerful reporting functionality includes:

- **Cross-enterprise business view**
Management Reporter provides organizations with a way to bring together financial information from different financial models or general ledger companies in order to create a consolidated view of the business.
- **Easy and secure report distribution**
Widely distribute dynamic and standard reports including financial statements, management reports, and ad-hoc analysis to the decision-makers across the organization.
- **Strong support for regulatory compliance**
Management Reporter helps organizations support generally accepted accounting practices (GAAP), international financial reporting standards (IFRS), and Sarbanes-Oxley regulations. Centralized data management, including security and business rules, and transactional reporting simplify regulatory compliance.
- **Enhanced partnership with IT**
IT no longer has to spend time generating, formatting, and customizing financial reports for the business. Business users can create their own reports, while IT can help ensure they have the right infrastructure and data to access richer, more targeted information.

(MORE)

Top features in Management Reporter simplify the financial reporting process:

- **Easy creation and customization**
Using the report wizard, key financial reports such as trial balance and income statements can be created in as few as seven steps. Additional templates are provided with Management Reporter that facilitate creating balance sheet and cash flow statements.
- **Advanced financial intelligence**
Hierarchies can be defined to facilitate the creation of different views of your business. Business users can create management, legal, and soft consolidated reports. Combined with comparative data like month to month, year over year, and actual to forecast, business users are better able to understand business trends. Additional concepts include year to date amounts and debits vs. credits.
- **Multiple ways to access reports**
Business users can create and generate secured reports that are distributed to a report library for viewing via a native viewer, or exported to either Microsoft Excel or to RDL for access through SQL Server Reporting Services. Formatting is preserved, while business users can manage and access reports through the Microsoft Office SharePoint® Server 2007 Report Center.
